

# List of approved hazard specialists

---

This document explains the complying development framework for potentially hazardous development on land within Special Activation Precincts and lists currently approved hazard specialists.

---

*State Environmental Planning Policy (Precincts - Regional) 2021 (PR SEPP)* sets categories of development that can be undertaken as complying development on land within a Special Activation Precinct (SAP). Some of these involve potentially hazardous activities.

Part 3 of Schedule 1E of the PR SEPP sets out the complying development certificate conditions that must be applied to a complying development certificate.

Schedule 1E, Part 3, Division 2 of the PR SEPP sets out development consent conditions for complying development involving potentially hazardous industry on land within a SAP.

The relevant provisions for Fire Safety and Hazards are set out in Schedule 1E, Part 3, Division 2, Section 20 of the PR SEPP:

- The required technical studies ‘Hazard Analysis’, ‘Fire Safety Study’ and ‘Hazard and Operability Study’ must be prepared by a by a qualified person approved by the Secretary of the Department of Planning, Housing and Industry. This approval is valid for three years.
- A certificate issued by the approved person must be provided to the principal certifier stating that the development has been constructed in a way that incorporates and complies with the recommendations in these technical studies.

A list of all approved persons and the studies they are approved to prepare are included in Table 1.

The principal certifier is required to check that the technical studies and supporting certificate have been prepared by an approved person, before a complying development certificate is issued.

The approved person that has prepared a study under Schedule 1E, Part 3, Division 2, Section 20 of the PR SEPP cannot be the same person, or work for the same company as the person that issues a certificate related to that study. However, both persons must come from the list of qualified persons approved by the Secretary or their delegate for that particular study.

It is a condition of the approval for persons to notify the department if there is any change to matters including professional indemnity insurance, court/tribunal proceedings, disciplinary action, or determination or employment information as soon as practical but no later than two months from the day the approved person was made aware of the change.

Approved persons cannot continue to prepare technical studies under Part 3, Division 2, Section 20 of the PR SEPP if they stop holding professional indemnity insurance.

---

**Table 1 - list of qualified persons approved to undertake technical studies under Part 3, Division 2, Section 20 of the PR SEPP**

The specialists in Column 1 have been approved by the Secretary to prepare the technical studies identified in Column 3, under the provision of Part 3, Division 2, Section 20 of the PR SEPP.
